Virtual Chief Information Security Officer (vCISO)

Our virtual Chief Information Security Officer (vCISO) services provide organisations with on-demand access to experienced cyber security leadership at a fraction of the cost of a full-time employee.

Using a well-defined, pragmatic and cost-effective approach delivered through highly experienced, qualified vCISOs, our services enable organisations to gain quick access to security expertise and support when they need it. Backed by a virtual team of subject matter experts, our vCISOs spearhead security improvement programmes, resulting in an improved security posture, leadership and governance.

Our vCISO packages provide:

- A bespoke security plan built and executed through the vCISO service, aligned to business strategy and risk appetite.

- Executive reporting and board-level representation.

- On-demand support to security incidents, customer requests and audit requirements.

And much more…

BENEFITS

Strategic leadership
Your organisation will gain access to seasoned cyber security executives who understand how to align security with business priorities.

Mature security posture
Our vCISOs are adept at quickly identifying security gaps, prioritising risks and implementing a roadmap to strengthen organisational security posture using proven frameworks and best practices in a cost-effective, pragmatic manner.

Flexible engagement models
CSA Cyber's vCISO services scale to meet your organisation's size, budget, and evolving risk landscape. All our packages are completely bespoke to your organisation.

Knowledge and expertise
Our consultants have a range of industry-recognised qualifications including CISSP, ISO 27001, SABSA Chartered Architect and more.
