Cyber Bundles for IT MSPs

Offer end-to-end protection for your clients with our exclusive CSA Cyber Bundles

What do **you** gain from partnering with CSA?

Improved Client Protection

Add to your client services with enhanced protection by our cyber experts.

Strengthened Client Relationships

You manage your client relationships while we take care of the security.

Extended Portfolio

Earn more while satisfying your clients with a fuller service.

In 2024, 49% of UK businesses experienced a cyber attack or breach...*

The cyber security landscape is constantly evolving, with new products emerging to address a wide range of security needs. However, most security incidents still stem from fundamental issues, including **malicious software**, **insecure website access**, **phishing**, and **unpatched systems**.

To address these common vulnerabilities, CSA are offering expertly curated, bundled packages so your clients can leverage trusted products to detect and protect against the majority of cyber threats.

About CSA

Established in 2013 and now part of FluidOne, Cyber Security Associates (CSA) is a leading provider of cyber consultancy and managed services that detect, protect and educate against the evolving cyber threat.

We have built our team from Government and Commercially experienced specialists holding current and relevant cyber certifications. Our core services are centred around a UK-based 24/7 Security Operations Centre (SOC), entirely staffed by UK GOV SC Cleared employees.

CSA Cyber Bundle - Level 1

SentinelOne EDR (Control)
An AI-powered cyber security platform that autonomously protects endpoints and devices from malware, ransomware, and advanced threats.

SentinelOne EDR (Complete)
A dedicated MSSP Tenant for seamless distribution and management of SentinelOne Complete licenses across your clients.

CSA SOC
24/7/365 Managed Detection and Response, monitoring all SentinelOne alerts for your customers to ensure continuous threat detection and rapid response.

HYAS DNS Filter
Advanced DNS filtering to block threats and enforce content policies, all easily managed through the HYAS DNS MSSP Tenant.

Qualys VM Scanning
Continuous vulnerability detection across all endpoints and servers, with detailed telemetry available through CSA's "mycyberdashboard" portal.

Qualys Patching (endpoint only)
Patching of third-party applications (and OS, if necessary) managed through Qualys agents, with output accessible via CSA's "mycyberdashboard" portal.

Assisted CE Certification
Assistance in obtaining the IASME Cyber Essentials Certificate to meet UK Government-backed cyber security standards.

Assisted CE & CE+ Certification
Assistance in obtaining both the IASME Cyber Essentials and Cyber Essentials Plus certifications, ensuring foundational cyber security protection, and enhanced verification.

Hexiosec ASM
Access an external attack surface management platform, continuously scanning your perimeter IPs, websites, and domains to identify and mitigate risks.
